

Ladenko TwinSlide or TrippleSlide Design

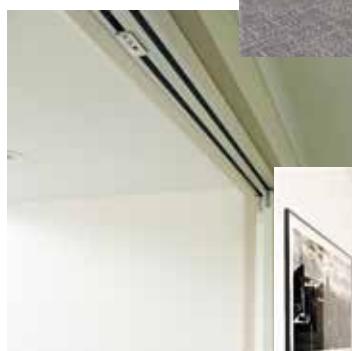

Custom Sizes | 180kg door weight | Custom Stud Size | Architrave | Square Set | P50 Shadow Line

The Ladenko TwinSlide and TrippleSlide systems are available and suitable for both residential and light commercial applications.

The Ladenko TwinSlide is a custom made cavity sliding door system is manufactured from select grade kiln dried hardwood and is designed to carry doors weighing up to 180kg.

Manufactured to custom sizes, the system allows for two or more overtaking doors to go into the same wall cavity space giving the widest walk through area in the shortest wall space and allows the doors to slide into the same cavity space smoothly and simultaneously. This system is suitable for both residential and light commercial applications.

Ladenko TwinSlide is a premium cavity sliding door system constructed as a functional solution to maximise space and is designed for use throughout a wide variety of residential and commercial spaces.
